

WEDNESDAY, MARCH 1

10:00 AM Disruptors in the World of Agriculture: *What to Watch & What to Do*

Ag Trends and Silent Disruptors farmers face in Production Ag today. Thought challenging issues we need to be watching like ESG, Climate, Lab Raised meat, Worker Shortage & Consumer Sentiment, as well as some opportunities to help ensure the future sustainability of your Farm. Be sure to bring a pen or pencil because there's homework on the spot.

Presented by: Doug Johnson from Moody's Analytics

11:00 AM Managing the Risk of Conservation Implementation

Conservation practices, such as cover crops and relay cropping, are good for soil health. However, the risks associated with implementing a new practice can leave some farmers hesitant to act. Join us for a presentation and discussion on how to manage these risks, including cost-share opportunities and federal crop insurance.

Presented by: Kalee Olson, Policy Associate at the Center for Rural Affairs.

12:00 PM Solar and Wind for Agriculture – A look at both and which way to go

Presented by: Michael Shonka – Solar Heat and Electric

1:00 PM New at this year's 2023 Triumph of Ag Expo in Omaha, an opportunity to be part of a commodity market discussion and live podcast recording.

Grain IQ podcast host Chad Moyer will join market analysts Darin Newsom of Darin Newsom Analysis and Wade Stevens of Agriculture Risk Consulting (ARC) Group to learn about the latest trends and factors influencing commodity trade.

In addition to the live podcast recording, attendees will have the opportunity to ask their commodity marketing questions to Newsom and Stevens.

Grain IQ is a production of the Nebraska Rural Radio Association, in cooperation and with support from the Nebraska Soybean Board.

Listen to Grain IQ on Spotify, Apple Podcasts, YouTube or ruralradionetwork.com.

3:00 PM Benefits of MASA Medical Transport

Presented by: John Ulsher of MASA Medical Transport

THURSDAY, MARCH 2

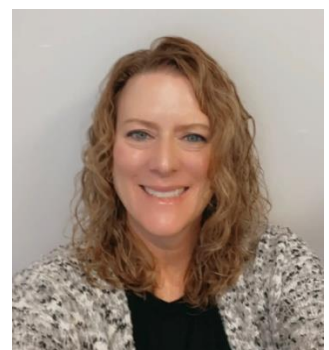

10:00 AM Solar and Wind for Agriculture – A look at both and which way to go

Presented by: Michael Shonka – Solar Heat and Electric

11:00 AM Biodiesel & Renewable Diesel. Fuels from the Farm

Biodiesel and renewable diesel are low-carbon, liquid fuel alternatives to diesel fuel, produced from feedstocks grown in the Midwest, supporting local farmers. This workshop will help you better understand both biodiesel and renewable diesel, and how biodiesel can benefit your fuel and your bottom line. Topics include an overview of recent changes to diesel fuel, biodiesel and renewable diesel basics and benefits, and housekeeping best practices for fuel storage on the farm.

Presented by: Lisa Pedderson of MEG Corp

12:00 PM Special Presentation – Farmer Veteran Award

1:00 PM Benefits of MASA Medical Transport

Presented by: John Ulsher of MASA Medical Transport
